

# Western Retro TrapLoader CS270... Automatic Singles Feed Conversion

**Note: Trap Sold Separately**

The TrapLoader CS270 is a simple bolt on automatic loader that holds 270 targets and converts the Western handset trap into an automatic singles trap machine.

Western traps have long been recognized for their quality, durability, & target presentation. However, as a manual “handset” or hand-loaded machine they’re more expensive to operate and subject to safety/liability concerns. Now, the CS270 provides for a safe, convenient and affordable alternative for most clubs looking for an automatic trap machine. Get yours today!
