

# Western Retro TrapLoader DS100 Automatic Doubles Conversion Kit

**Note: Trap Sold Separately**

The TrapLoader DS100 is a simple bolt on automatic loader that holds 100 targets and converts the Western handset trap into an automatic singles or doubles trap machine.

Western traps have long been recognized for their quality, durability, & target presentation. However, as a manual or hand-loaded machine they're more expensive for clubs to operate and subject to safety/liability concerns. Now, the DS100 provides an affordable alternative for individuals looking for a commercial automatic trap machine. Get yours today!
